

TEST P04-T04 · PART 04 · SEPTEMBER 8, 2026

# Did the \$50 billion to \$60 billion of investment-grade paper queued for after Labor Day 2026 price by October 2 with narrower new-issue concessions than August's deals?

Canonical: <https://deepstack.ltd/docket/#test-p04-t04> · Story: [Part 04: AI Spending Has Met Its First Real Bill](#) · Result: <https://deepstack.ltd/results/#result-p04-t04>

THE RULE

Yes if September's investment-grade issuance reached \$50 billion and the average new-issue concession on those deals, as the dealer figures cited in JunkBondInvestor's Credit Weekly report it, was below the double-digit basis points paid in August; the test resolves confirmed on yes and refuted if concessions held or widened.

THE OFFICIAL SOURCE

SIFMA, US corporate bond issuance statistics (September 2026)  
<https://www.sifma.org/resources/research/statistics/us-corporate-bonds-statistics/>

IF THE SOURCE IS LATE, REVISED OR SILENT

If no public concession figure covers the window, or issuance fell short of \$50 billion, the test is inconclusive, reviewed by the owner.

SPECIFICATION

Approved by Marco Cauduro on October 9, 2026, 03:49 UTC. The words were approved after the test date; the result of October 8, 2026 was read under them.

| Average new-issue concession on investment-grade deals priced Sept. 8 to Oct. 2, 2026 | No public figure; dealer estimates are not published as a series | <a href="#">SIFMA, US corporate bond issuance statistics (September 2026)</a> | Oct 9, 2026 |

THE VERDICT

INCONCLUSIVE

### Inconclusive: no public figure covers the September concessions

*The source did not settle the question; under the ambiguity clause the test is inconclusive. Resolved October 8, 2026.*

The test asked whether the \$50 billion to \$60 billion of investment-grade paper queued for after Labor Day 2026 priced by October 2 with narrower new-issue concessions than August's deals. The specification names SIFMA's issuance statistics as the public source and the dealer figures cited in JunkBondInvestor's Credit Weekly for the concession reading.

No public statistic reports an average new-issue concession for the window, and the dealer figures are not published as a series. Under the specification's own ambiguity rule the test is inconclusive. The Call stands as written.

APPROVER AND DATE

Approved by Marco Cauduro on October 9, 2026, 03:49 UTC.

EFFECT ON THE CALL

Conviction unchanged; the Call stands as written.

**The Call as it stands.** Prove the return · conviction 4/5 · "Capital intensity is not a moat. Every new AI dollar now has to out-earn its financing cost." (version 1, Sep 4, 2026).

This document is a demonstration of how DeepStack settles a question. It is not a contract and not an offer to resolve anyone else's market: DeepStack resolves its own tests, by a rule written down and approved before the result is published, and a named person approves every result. Analysis and opinion, not investment advice.
