TEST P07-T01 · PART 07 · OCTOBER 28, 2026

Does the Fed funds target, upper bound (FRED series DFEDTARU) read higher on its first observation after October 28, 2026 than on its last observation before it?

Canonical: https://deepstack.ltd/docket/#test-p07-t01 · **Story:** Part 07: The Fed Hiked. The Long End Still Climbed.

THE RULE

value after date > value before date => hike

THE OFFICIAL SOURCE

FRED, Fed funds target, upper bound (DFEDTARU)
https://fred.stlouisfed.org/series/DFEDTARU

IF THE SOURCE IS LATE, REVISED OR SILENT

FRED dates a change at its effective date, so the first observation after the date is the reading; a reading not in yet waits for the next run. A series that is late, revised or silent is inconclusive, reviewed by the owner.

SPECIFICATION

Approved by construction: the question, the source and the rule derive from the FRED series DFEDTARU and the comparison the test evaluates (value after date > value before date => hike); nobody writes the rule twice.

THE EVIDENCE CHAIN: WHAT WILL BE READ, AND WHEN

Pending. FRED, Fed funds target, upper bound (DFEDTARU) is read on its first observation after October 28, 2026; the rule above turns the reading into the verdict. The result is drafted the morning after the reading is in and published only after a human review.
https://fred.stlouisfed.org/series/DFEDTARU

THE VERDICT

PENDING *No result yet. The verdict is published only after a human review.*

APPROVER AND DATE

Awaiting the result; the approver and the date are recorded when it is published.

EFFECT ON THE CALL

None yet: the Call stands as written until the result is published.

The Call as it stands. Supply sets the long end · conviction 4/5 · “The bond market is pricing the AI bill, not a recession. The Fed cannot hike its way to a lower 10-year.” (version 2, Oct 9, 2026).

This document is a demonstration of how DeepStack settles a question. It is not a contract and not an offer to resolve anyone else’s market: DeepStack resolves its own tests, by a rule written down and approved before the result is published, and a named person approves every result. Analysis and opinion, not investment advice.
