DEEPSTACK The Buildout · Part 16 · Memo

MARKETS

The Seller Holds the Paper

Nvidia was owed 59.6 days of sales on July 26, 2026, against 45.4 in April, by DeepStack's arithmetic from its filings, and its guarantee table reached $108.5 billion from $3.5 billion, up to $105 billion of it signed in August for one Ohio campus and phased in from fiscal 2029. The buyers are real. Part of the money they pay with came from the seller.

By DeepStack · October 19, 2026 · Markets · 14 min read on the page · deepstack.ltd/stories/the-seller-holds-the-paper/

THE DEEPSTACK CALL

Skeptical The seller finances part of the demand

Nvidia's receivables ran 9% to 16% of sales above its own collection pace by July 26, 2026; five accounts owed 70% of them.

Conviction Moderate (3/5) · Version 2 · Oct 19, 2026

WHAT TO DO WITH THIS

1. Compute days outstanding yourself on November 18: receivables over the quarter's revenue, times 91. July 26, 2026 gave 59.6.
2. Split Nvidia's $108.5 billion of guarantees by when they bind: $105 billion for SB Energy phases in from fiscal 2029; $3.5 billion is live.
3. Read Broadcom's $29B backstop and the $42B note facility in its Aug 2 10-Q, which Reuters ties to Anthropic, before its Dec 9 report.

WHAT WOULD CHANGE OUR MIND

- Nvidia's 10-Q for the quarter to Oct 25, 2026 puts days outstanding below 51.1, the average before July: the second quarter was a peak.
- Free cash flow tops 71% of net income on Nov 18, its average in the four quarters before July: the cash came in and the terms were timing.
- AMD or Broadcom reports a gigawatt-scale accelerator deal with no warrant, investment, loan or guarantee by Dec 9: demand pays its own way.

THE FULL ARGUMENT

DeepStack's view is that the demand is real and the seller is financing part of it. In the quarter to July 26, 2026 Nvidia's receivables ran 9% to 16% of its sales above its own recent collection pace, a ceiling on what it financed, turned 36% of its net income into free cash and listed guarantees of up to $108.5 billion, most of them phased in from fiscal 2029. Five accounts owed 70% of its receivables, and two labs stand behind much of the chain: OpenAI behind the SB Energy guarantees, Anthropic behind the $42 billion note facility in Broadcom's 10-Q for the quarter to August 2, which Reuters ties to it, and the TPU contracts Burry reads into Google's backlog. Outside capital is real too, but some of it arrived with a seller's backstop beneath it, as Apollo's did at Broadcom. The single most important reason for caution is timing: late-quarter shipments lift receivables, so one quarter can overstate the strain. The view changes if days outstanding fall below 51.1 in the quarter to October 25, 2026, or if free cash flow tops 71% of net income, its average in the four quarters before July. The first answer arrives on November 18.

BY THE NUMBERS

59.6 days

Days of sales Nvidia was owed at July 26, 2026, from 45.4 at April 26

NVIDIA Forms 10-Q filed May 20 and Aug 26, 2026; DeepStack calculation: receivables over the quarter's revenue, times 91

$15.1B

Receivables above Nvidia's April collection pace, July 26, 2026: 15.7% of the quarter's revenue

NVIDIA Forms 10-Q, read Oct 12, 2026; DeepStack calculation; $9.1B, or 9.4%, against the four-quarter average

$108.5B

Nvidia's maximum exposure on guarantees in its July 26, 2026 table, from $3.5B at April 26

NVIDIA Form 10-Q filed Aug 26, 2026; up to $105B for SB Energy, phased in from fiscal 2029

70%

Share of Nvidia's receivables owed by five direct customers, July 26, 2026

NVIDIA Forms 10-Q filed Aug 26 and May 20, 2026; three customers held 64% at April 26, 2026

WHO IS ON EACH SIDE

How much of the money buying AI chips was lent, guaranteed or invested by the companies selling them?

Each voice is attributed and paraphrased, dated where the date is known, with a link where one exists. DeepStack shows no score, ranking or accuracy for any person. The page: `deepstack.ltd/sides/the-seller-holds-the-paper/`

THE DATED TESTS

What would settle it, on the Docket. A test is specified when an outsider can settle it without asking anyone: the question, the source, the rule and what happens if the source is late, revised or silent.

Nov 18, 2026 `p16-t01` PENDING

Nvidia reports its quarter to October 25, 2026: whether days sales outstanding, receivables over revenue times 91, hold at or above 51.1, the average before July, after 59.6 in the quarter to July 26.

Question	In NVIDIA's Form 10-Q for its fiscal quarter ended October 25, 2026, is accounts receivable, net at quarter end, divided by the quarter's revenue and multiplied by 91, at or above 51.1 days?
Source	SEC EDGAR, NVIDIA Form 10-Q for the quarter ended October 25, 2026 (balance sheet and statement of income), CIK 0001045810 `www.sec.gov/cgi-bin/browse-edgar?action=getcompany&CIK=0001045810&type=10-Q`
Rule	DeepStack computes days sales outstanding from two figures the 10-Q prints: accounts receivable, net on the condensed consolidated balance sheet at October 25, 2026, and revenue on the condensed consolidated statement of income for the three months then ended, times the 91 days of the quarter, rounded to one decimal. The answer is yes if the figure is 51.1 days or more; no if it is below 51.1. The line is the average of the four quarters before the quarter ended July 26, 2026, computed the same way: 54.1 (July 27, 2025), 53.3 (October 26, 2025), 51.4 (January 25, 2026) and 45.4 (April 26, 2026); the quarter ended July 26, 2026 gave 59.6. The payment terms the filing describes are read alongside and do not decide the test.
If the source is late, revised or silent	If the 10-Q is not public on EDGAR by December 15, 2026, the test is inconclusive, and the Result says what was read and what was missing; the next reading is December 31, 2026. If the period the 10-Q covers is not 91 days, the rule uses the number of days its period dates give. Figures are read as first filed; a later amendment does not reopen the test.

Nov 18, 2026 p16-t02 PENDING

Nvidia reports: whether the guarantees note in its 10-Q puts total maximum exposure above $108.5 billion, the figure in the table for July 26, 2026.

Question	Does the guarantees note in NVIDIA's Form 10-Q for its fiscal quarter ended October 25, 2026 put the total maximum gross exposure under its guarantees above $108.5 billion?
Source	SEC EDGAR, NVIDIA Form 10-Q for the quarter ended October 25, 2026 (notes to the condensed consolidated financial statements, guarantees), CIK 0001045810 `www.sec.gov/cgi-bin/browse-edgar?action=getcompany&CIK=0001045810&type=10-Q`
Rule	Read the total maximum gross exposure the guarantees note gives, including guarantees the note says were signed after the quarter ended, as the table for July 26, 2026 did. The answer is yes if it is above $108.5 billion; no if it is $108.5 billion or below. If the note gives no total, the Result sums the maximum exposures the note lists and says that it summed them. The fair value of the guarantees and the phasing of the SB Energy guarantees are read alongside and do not decide the test.
If the source is late, revised or silent	If the 10-Q is not public on EDGAR by December 15, 2026, the test is inconclusive, and the Result says what was read and what was missing; the next reading is December 31, 2026. If the note gives no maximum exposure for a guarantee it describes, the test is inconclusive, and the Result says what was read and what was missing; the next reading is NVIDIA's annual report on Form 10-K for fiscal 2027, by March 31, 2027.

Nov 18, 2026 p16-t03 PENDING

Nvidia reports: whether its 10-Q puts AI cloud agreements, cloud services it commits to buy from its own customers, above the $36 billion of July 26, 2026.

Question	Does NVIDIA's Form 10-Q for its fiscal quarter ended October 25, 2026 report AI cloud agreements, in its disclosure of purchase obligations and other commitments, above $36 billion?
Source	SEC EDGAR, NVIDIA Form 10-Q for the quarter ended October 25, 2026 (commitments and contingencies note), CIK 0001045810 `www.sec.gov/cgi-bin/browse-edgar?action=getcompany&CIK=0001045810&type=10-Q`
Rule	Read the amount the 10-Q gives for AI cloud agreements, the cloud services NVIDIA has committed to buy, at October 25, 2026. The answer is yes if it is above $36 billion; no if it is $36 billion or below. Data center leases NVIDIA signed to pass on to third parties, and other purchase obligations, are read alongside and do not decide the test.
If the source is late, revised or silent	If the 10-Q is not public on EDGAR by December 15, 2026, the test is inconclusive, and the Result says what was read and what was missing; the next reading is December 31, 2026. If the 10-Q gives no amount for AI cloud agreements, the test is inconclusive, and the Result says what was read and what was missing; the next reading is NVIDIA's annual report on Form 10-K for fiscal 2027, by March 31, 2027.

Nov 18, 2026 p16-t04 PENDING

Nvidia reports: whether the direct customers listed at 10% or more of receivables hold more than 70% together, after five held 70% on July 26, 2026.

Question	In NVIDIA's Form 10-Q for its fiscal quarter ended October 25, 2026, do the direct customers the filing lists at 10% or more of accounts receivable together account for more than 70% of accounts receivable?
Source	SEC EDGAR, NVIDIA Form 10-Q for the quarter ended October 25, 2026 (concentration of credit risk), CIK 0001045810 www.sec.gov/cgi-bin/browse-edgar?action=getcompany&CIK=0001045810&type=10-Q
Rule	Sum the percentages of the accounts receivable balance at October 25, 2026 that the 10-Q gives for each direct customer at 10% or more. The answer is yes if the sum is above 70%; no if it is 70% or below, or if the filing lists no such customer. Indirect customers and the shares of revenue are read alongside and do not decide the test.
If the source is late, revised or silent	If the 10-Q is not public on EDGAR by December 15, 2026, the test is inconclusive, and the Result says what was read and what was missing; the next reading is December 31, 2026. If the filing gives the concentration only as a combined figure, that figure decides.

When filed p16-t05 PENDING

Anthropic's first public registration statement: its first audited revenue, and how much of it runs through investors that also sell it compute.

Specification pending

How DeepStack settles a question

Every Part of The Buildout asks one question and gathers the strongest case on each side from named investors and analysts, attributed, dated and linked. DeepStack then takes a side in The DeepStack Call, names what it would take to change its mind, and sets dated tests that an outsider can read on the day. When a test comes in, the result is published with its evidence, confirmed, refuted or inconclusive, and the Call's history records when the house changed its mind and why. No person is scored or ranked. No accuracy rate is shown until ten results exist.

Quoted passages are short, attributed by name and linked to their source; the paraphrases are DeepStack's. Quote this memo with attribution and a link to the canonical page.

This memo reflects the page as of October 19, 2026. Canonical page: https://deepstack.ltd/stories/the-seller-holds-the-paper/. Who is on each side: https://deepstack.ltd/sides/the-seller-holds-the-paper/.

Analysis and opinion, not investment advice.
